

Yingli Americas

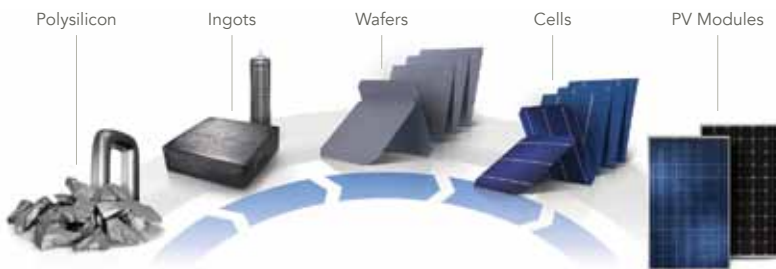

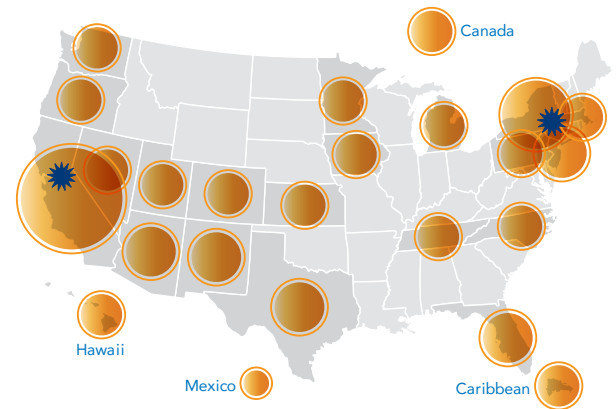

U.S. Soccer Powered by Yingli Solar

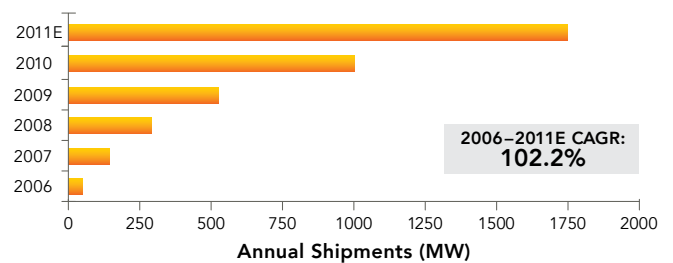

Yingli Green Energy (NYSE: YGE) is one of the world's largest fully vertically integrated photovoltaic (PV) manufacturers.

Founded in 1998, we opened offices in New York and San Francisco in 2009 under the subsidiary Yingli Green Energy Americas (YGEA).

We are one of the fastest-growing module suppliers in North America with projects in over 20 states, Canada, Mexico, and the Caribbean. Our customers span the commercial, utility, and residential markets.

Yingli global growth (MW)

MODULES

Multicrystalline

- High quality modules produced in-house from a balanced production capacity increasing to 800 MW by the end of 2011
- Product family spans 165 W to 285 W
- NEW! Now includes Z Series with Zep Compatible™ frame
- Module efficiencies up to 14.7%

Monocrystalline

- High efficiency "PANDA" modules created from new cell technology; production capacity increasing to 900 MW by the end of 2011
- Product family spans 190 W to 265 W
- Module efficiencies up to 16.2%

CORE ADVANTAGES

Proven Experience

We are a leading supplier in California, the nation's largest solar market, and have successful projects with top-tier customers across the U.S; globally, we have delivered more than 2 GW.

Partnership Approach

We offer a non-competitive sales experience by uniquely aligning our interests with our customers. We do not compete for project development, ownership, or in other areas.

Fully Vertically Integrated

We are the largest company to manufacture silicon solar modules along the entire PV value chain, from polysilicon to module assembly. This ensures tight control of our material and production quality.

Locally Based Team

We have a diverse team of commercial and technical experts that offer highly responsive nationwide support.

World-Class Brand

We are dedicated to bringing solar power mainstream and are proud to be the first renewable energy company to sponsor the U.S. Soccer teams and the FIFA World Cup™.

Yingli Americas: Success Stories

PROJECT NAME NY JETS TRAINING FACILITY
Size: 690 kW **Location:** Florham Park, New Jersey
Project Type: Commercial **Number of Modules:** 3,000
Installer/Partner: 

PROJECT NAME HOME IN KANSAS (PANDA MODULES)
Size: 5.71 kW **Location:** Lawrence, Kansas
Project Type: Residential **Number of Modules:** 22
Installer/Partner: 

PROJECT NAME DENVER INTERNATIONAL AIRPORT
Size: 4.4 MW **Location:** Denver, Colorado
Project Type: Commercial/Institutional **Number of Modules:** 19,000
Installer/Partner: 

PROJECT NAME KAISER PERMANENTE'S MEDICAL CENTER
Size: 895 kW **Location:** Santa Clara, California
Project Type: Commercial/Institutional **Number of Modules:** 3,892
Installer/Partner: 

PROJECT NAME TOWN OF HOPKINTON
Size: 267 kW **Location:** Hopkinton, Massachusetts
Project Type: Commercial/Institutional **Number of Modules:** 1,699
Installer/Partner: 

PROJECT NAME PARADISE SOLAR ENERGY CENTER
Size: 6.2 MW **Location:** Paulsboro, New Jersey
Project Type: Utility **Number of Modules:** 26,224
Installer/Partner: American Capital Energy and Nextera Energy Resources
