DOUBLED STRENGTH
FOR MULTIPLIED RELIABILITY

Whenever the conditions are requiring a more robust solution, our modules are the right choice. By the additional layer glass on the rear side, our modules are much more robust and reliable. Carefully chosen materials, state of the art solar cells and our experience in manufacturing ensure in addition the high product quality.

+ W/m²

High Power Density
High efficiency, multicrystalline silicon cells with high transmission and textured glass could minimize installation costs and maximize kWh output of your system per unit area.

Extended Size
Our large-format module facilitates system-level cost savings through reduced handling and installation times.

Durability
Durable PV modules, independently tested for harsh environmental conditions such as exposure to salt mist, ammonia or known PID risk factors.

Mechanical Performance
No shading aluminium frames enhance the mechanical performance of modules and the installation efficiency of system.
